

Get Over It

This challenge is not really related to the storyline. It mentions a bridge loved by someone named Bridget and a picture of the bridge is given. We need to find the name and length of the main span of the bridge. This is the picture:

After running the image through Google Lens, a very common answer was given: Eleanor Schonell Bridge. After google searching the length of the main span, it was 183m.

Therefore, the flag is:

DUCTF{Eleaner_Schonell_Bridge-183m}
